PROFESSIONAL EXPERIENCE

WPH Digital

Analyst Programmer II

January 2024 – August 2025

- Developed and maintained critical features of an Employee Assessment app and Health Inspector Assistant app using Next.js, which were showcased in roadshows to show viability of AI.
- Worked with DevOps team to setup integration of AWS and Azure cloud services, such as AWS Bedrock, DynamoDB, and Azure OpenAI, to AI Applications.
- Implemented user roles and permissions features to Employee Assessment app, using Prisma ORM to connect to a PostgreSQL database
- Lead a team of three to develop an internal HR Assistant app developed with .NET and integrated with AWS Bedrock, which kickstarted AI Projects in the company.
- Lead a team of five to develop an internal Microsoft Teams Bot application that automatically tracks tasks of employees from their email and Teams messages using Copilot Studio, Power Automate, Azure OpenAI Services, and Azure Function App
- Maintained a small logging feature, making changes and fixes using .NET and SQL Stored Procedures to satisfy client requirements
- Worked on Power Automate flows and Pages in a Power Platform POC to test its viability in an existing business solution
- Mentored and trained new developers, teaching them basic concepts and principles through Next.js and .NET

University of the Philippines Baguio

Research Assistant

October 2020 – January 2023

- Managed content for University Website using Joomla CMS
- Assisted in preparing the rework of the University Website by providing layout design and relevant content for initial population
- Created the University's online repository for the official *Ti Similla* newsletter, issues, and publication using Wordpress

FullSuite

Junior Developer

September 2019 – September 2020

- Developed and maintained frontend components of an Internal Payroll App, Employee Management app and Internal web-based BIR fillable form using React
- Developed and deployed mobile version of internal payroll app using React Native

PERSONAL PROJECTS

Fabula Ultima Cheat Sheet [link](#) | [github link](#)
